

## Job Description

### Job Title: **Software Developer**

A unique opportunity to join an expanding software development team based in Putney, London within a global company who have a well-established and stable client base.

We're looking to build upon previous success by continuing to enhance our market-leading Facilities Management and PPP software products as well as build a whole new set of exciting products for the future. It will be challenging work, refreshing a deep-rooted product set, but ultimately rewarding as you will be able to help shape the company's products and services going forward - from process to technology, with plenty of self-made opportunity along the way.

We are recruiting talented and enthusiastic software developers to join our dynamic team on this exciting journey. If you are a problem-solver who can work in cross-functional Agile development teams, regardless of experience and level please send your CV! We are looking to shape the team around the abilities of those who apply.

**Reporting to:** Software Development Manager, UK

**Key skills required:**

Contact us if you have experience in several of the following areas:

- Azure or other cloud technology
- Microsoft stack technology (C#, SQL, Xamarin)
- Understanding of SDLC and different software architectures
- Building and consuming Web Services (SOAP, WebAPI, RESTful)
- Web and Mobile App development
- Experience of build processes and technologies including CI/CD
- Knowledge of Agile frameworks/methodology
- A team player that enjoys collaboration
- An interest in AI, ML and IoT
